

1. Student Details

Particular	Details
Student Name	Mausam Kumar
Registration Number	12629408
Roll No.	14
Section / Group	K2P26HR
Term	First Semester (2026-27)
Selected EDU-Revolution Benefit	Exploratory Data Analysis (FutureSkills Prime)
Date of Registration	22/09/2026
Reference ID(s)	28395

2. Introduction to EDU-Revolution

Purpose: The EDU-Revolution initiative helps students learn new skills outside regular classroom subjects by completing professional online courses.

Objectives:

- To encourage self-paced learning and technical skill development.
- To provide access to government and industry-approved certification courses.
- To help first-year students gain practical knowledge early in their college life.

Significance: For a Computer Science student, learning data analysis helps build strong problem-solving skills and prepares them for future data science and software development tasks.

3. Available EDU-Revolution Benefits

S. No.	Benefit / Initiative	Brief Description
1	Exploratory Data Analysis (FutureSkills Prime)	An industry and government-approved course focused on data cleaning, statistical analysis, and visualization.
2	Skill-Enhancement Workshops	Hands-on training sessions for coding, debugging, and using development tools like Git and GitHub.
3	Industry Mentorship Programs	Sessions with tech experts to get guidance on career paths and industry requirements.
4	Advanced Coding Bootcamps	Special coding practice to improve data structures, algorithms, and logic building.
5	Research & Innovation Support	Guidance for students interested in doing minor research projects and technical writing.
6	Professional Communication Modules	Training modules to improve English speaking, technical writing, and interview presentation skills.

4. Selected Benefit and Justification

Selected Benefit: Exploratory Data Analysis (FutureSkills Prime)

Description & Key Features: This certification course teaches how to inspect, clean, and visualize data. It is aligned with competency standards developed by IT-ITES Sector Skills Council Nasscom.

Eligibility & Requirements: Open to first-year B.Tech Computer Science students with basic programming knowledge.

Registration Process: Registered through the official portal, completed the learning modules, and successfully finished the course on 22nd September 2026 (Certificate ID: 1249396).

Expected Benefits: A government-approved certificate, hands-on experience with data tools, and a stronger academic resume.

Justification: As a Computer Science student interested in Artificial Intelligence and Machine Learning, learning data analysis is very important. This course connects classroom learning with real-world data science applications.

5. Action Plan

S. No.	Activity / Action	Timeline	Expected Result
1	Course registration and portal login	Early September 2026	Successful enrollment in the course.
2	Completing learning chapters and exercises	Mid-September 2026	Understanding data cleaning and analysis.
3	Final course assessment	22nd September 2026	Passing the final assessment test.
4	Downloading certificate and verifying ID	22nd September 2026	Obtaining Certificate ID 1249396.
5	Preparing and submitting CA2 report	September 2026	Final submission of report and evidence.

6. Expected Impact

Academic Enrichment: Helps connect regular college studies with practical industry skills.

Skill Development: Improves data handling, logical thinking, and analytical abilities.

Career Preparation: Adds a valuable Nasscom-approved certificate to the student's profile for future internships.

Professional Development: Builds good time management and self-learning habits.

7. Supporting Evidence Checklist

- ☒ Certificate of Completion for Exploratory Data Analysis (Issued: 22 Sep 2026).
- ☒ Certificate / Reference ID: 1249396 (Issued by IT-ITES SSC Nasscom).
- ☒ QR Code verification scan proof from official portal.
